

## Recap of Charles R. Macedo's™ World Congress Webinar on Innovations in Machine Learning and Challenges Associated with Protecting Computer Invented Innovations

### *World Congress*

On June 18, partner [Charles Macedo](#) and [Daniel Dardani, Technology Licensing Officer at MIT's Technology Licensing Office](#) presented a World Congress webinar on innovations in machine learning and the challenges associated with protecting computer invented innovations.

Charley and Daniel explored current practices and strategies to protect AI innovations and discussed emerging barriers against naming computers as authors or inventors for copyright and patent protection, and provided tips to deal with them.

- Watch a [video of the full presentation](#).
- View the [slides from the webinar](#).
- Follow [Amster, Rothstein & Ebenstein LLP](#) on [LinkedIn](#) to learn more about the firm and its work.

Join us for our next webinar on July 23 at noon ET with the Licensing Executives Society on the [Impact of Covid-19: Disruption, Acceleration & Innovation](#). You can register for the webinar [here](#).

We would be happy to conduct a private version of this CLE program for your organization, and if you are interested or have any questions, please contact Charley at [cmacedo@arelaw.com](mailto:cmacedo@arelaw.com).
